**ANACONDA-DEER LODGE COUNTY SMELTER SUPERFUND SITE
INSTITUTIONAL CONTROLS/COMMUNITY PROTECTIVE MEASURES PROGRAM**

For Your Information

Incidental Mine Waste Notice

Residents and property owners in Anaconda-Deer Lodge County need to be aware that the area includes many historic mining districts that may contain hazardous waste. These sites include the Anaconda Smelter Superfund and Georgetown Railroad Superfund sites as well as many other abandoned mined areas in the county. If during excavation and development activities you locate potential mine waste or suspicious materials, ADLC recommends you do the following:

- Cease all activities which might expose yourself, others, or your animals to potential waste until an investigation by a qualified professional is conducted and the site is determined to be safe.
- Contact the ADLC Superfund Department at (406) 563-7476 or the ADLC Planning Department at (406-563-4010). In the event, ADLC does not have jurisdiction of the site, you will be directed to the appropriate agency.
- Common smelting waste includes black slag and cinders, pale yellow and orange tailings, white/gray powdery ash material, and rocks with a scaly green deposit on the surface.

If you require further assistance, please contact the ADLC Planning Department at (406) 563-4010. ADLC's Superfund experts as well as other county staff will do their best to either assist you or direct you to the appropriate party for assistance.

Superfund Soil Repository

Some projects in Anaconda-Deer Lodge County may involve contaminated soil that may need to be placed in the Superfund Soil Repository. After reviewing your application, the county and Superfund will determine if special soils handling is required and you will be given written instructions by Superfund on how to handle the soils and they will guide you through the process.

Placement of soil in the repository must be part of an approved Administrative Development Permit and Institutional Controls Work Plan. The Superfund Coordinator (406) 563-7476, must be contacted at least 24 hours in advance of beginning excavation. The repository is generally open Monday through Friday, 7 a.m. to 4 p.m. and some seasonal hours may apply.

Only Superfund-related contaminated soil, mining millings, or smelting waste material may be placed in the repository.

A pre-entry briefing is required prior to placing soil and the Superfund Coordinator must be notified at the beginning and the end of each day's hauling activities.

Personal safety equipment is required for all drivers and passengers.
